

# Implant Patient Workflows

1. Pre-treatment workflow
2. Post-treatment workflow
3. Disease workflow

# Pre-treatment workflow (for the patient considering implants)

Referral to DCP for:

- baseline charting (if indicated)
- FMPS (regardless)
- Smoking cessation
- OHI
- Discussion of risk factors in peri-implant disease

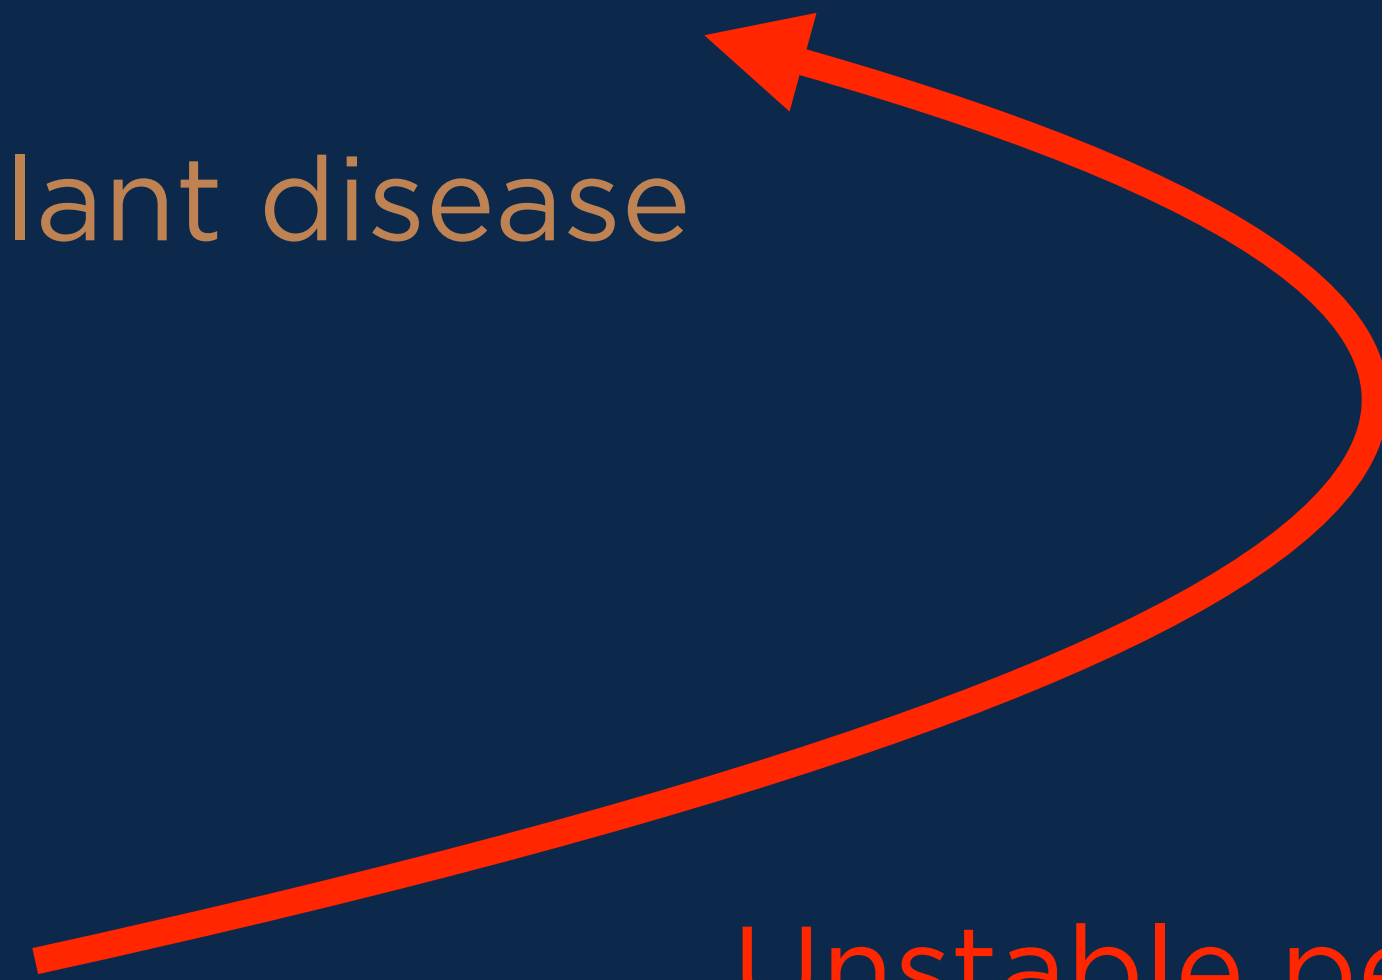

Is the:

- perio stable (<10% FMBS)?
- OH good (<20% FMPS)?
- patient a non-smoker?

Unstable periodontal disease

OR

Unwilling to accept risk of  
smoking/poor OH

# Pre-treatment workflow

Is the:

- perio stable (<10% FMBS)?
- OH good (<20% FMPS)?
- patient a non-smoker?

Implant placement, restoration,  
post operative IOPA

Referral to DCP for:

- Tailored OHI immediately post-fit
- 3/12 SPT (BOP, PPD, scaling, OHI)
- (Baseline: 1yr PPD and IOPA)

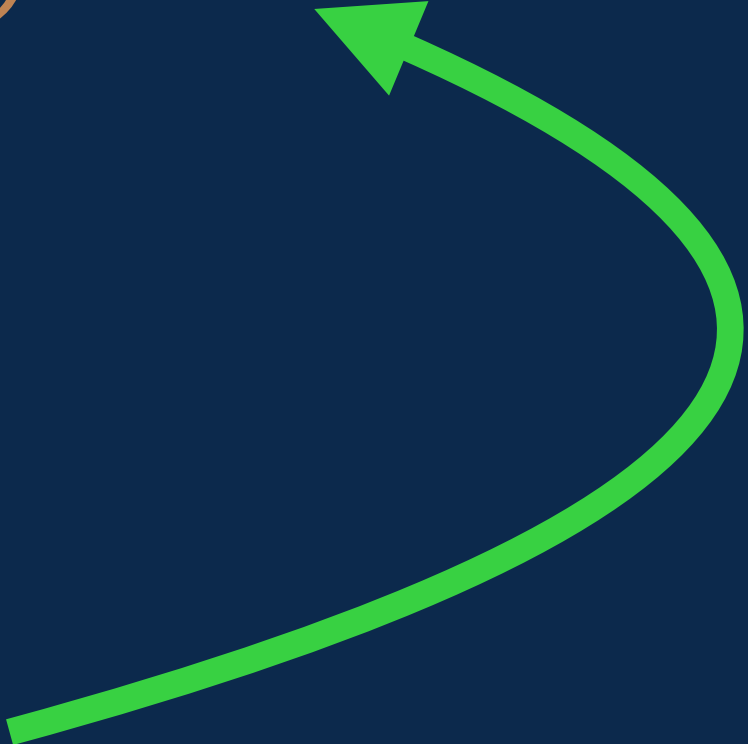

# Post-treatment workflow

Referral to DCP for:

- 3/12 SPT (BOP, PPD, scaling, OHI)

Any BOP or change in PPD?

No

Yes (and move to disease workflow)

Radiograph

# Peri-implant disease workflow

**Move to post  
treatment workflow**

Radiograph:  
bone loss?

Yes

No

Discuss diagnosis and treatment options:

1. NST only
2. Surgical treatment (*if OH excellent*)
3. Explantation +/- replacement

Referral to DCP for NST:

- Disclosing, OHI, biofilm disruption
- Discussion of risk of progression!

BOP resolved?

No

Yes
