

A NEW APPROACH TO DENTAL TREATMENT MEANS SMILES ALL ROUND

A new dental practice in the North Cardiff suburbs is revolutionising the patient experience.

A visit to the dentist can often be pretty stressful. But North Cardiff Dental & Implants does everything to ensure that your experience will be as stress-free as possible right from the start.

Conveniently located in Rhiwbina, just off the M4, you won't even have to worry about where to leave the car, as you pull into their spacious on-site car park.

And, from the moment you arrive in reception, everything continues to be geared towards making your visit more relaxing than anything you might be used to.

You'll be welcomed by a friendly member of staff, before getting the chance to immerse yourself in a unique, almost rain-forest-like sanctuary, complete with the sounds of cascading waterfalls and an abundance of lush green vegetation.

And the commitment to your comfort doesn't stop there. Their approach to the challenges of the ongoing pandemic are also designed to ensure your absolute peace of mind throughout your visit. From their state-of-the-art sterilisation equipment, to the design of the building itself, their adherence to the highest possible hygiene standards means you'll experience all procedures in a safe and trusted environment.

When asked what makes the practice so special, Principal Dentist Dr Zara Wani said "everything you'd expect from a cutting-edge centre of dentistry is here. And as well as having the latest technology, it's also our people that make us stand out from the rest. Whether you need dental implants, root canal treatment or cosmetic enhancements, we've got a team of passionate, dedicated professionals ready to help. We're really excited to welcome patients to a whole new dental experience."

Need to know more about this dental revolution, happening right on your doorstep? Check out further details on North Cardiff Dental & Implants' website. Or maybe just call or email them, to speak with a member of their friendly team, and start your journey towards a more relaxed dental experience, as well as a more confident you.

"What really drew me in to this project is the fact that South Wales hasn't seen anything like this before. The facilities are truly world class. And Dr Aly Virani is one of only a few dentists in the UK who dedicates all of his clinical time to dental implants."

Lauren Venables, Practice Manager
